

Energy...Environment...Economics

U.S. Department of Energy
National Energy Technology Laboratory
and
Spectroscopy Society of Pittsburgh

Triple "E" Seminar

- Provide an overview on the importance of energy in our daily lives and on the maintenance of industrial growth and economic well being of a nation.
- Enhance the understanding of the relationship among the production and consumption of energy, environmental effects, and the economy of our regions/country.
- Broaden the knowledge of classroom teachers, thus strengthening the math/ science curriculum of our schools.
- Foster energy awareness in our youngsters and develop their interest in the fields of science and technology.
- Use the resources available, within the Department of Energy, to assist the local, regional, and national educational systems.
