

Energy...Environment...Economics

**U.S. Department of Energy
National Energy Technology Laboratory
and
Spectroscopy Society of Pittsburgh**

Triple "E" Seminar

PURPOSE:

- Provide an overview on the importance of energy in our daily lives and on the maintenance of industrial growth and economic well being of a nation.
- Enhance understanding of the relationship among the production and consumption of energy, environmental effects, and economy of regions/country.
- Broaden the knowledge of classroom teachers, thus strengthening the math/science curriculum of our schools.
- Foster energy awareness in our youngsters and develop their interest in the fields of science and technology.
- Use the resources available, within the Department of Energy, to assist the local, regional, and national educational systems.

WHEN: November 5-6, 2009

WHERE: U.S. Department of Energy, National Energy Technology Laboratory
Cochrans Mill Road, located in South Park Township, Pennsylvania.

TARGETED FOR: Teachers in K-6 Grade Levels

CONDUCTED BY: NETL senior scientists/engineers and experienced educators from educational institutions. Registration is free and lunch will be provided.

Act 48 Credits: Attendees will receive Act 48 credits through the Allegheny Intermediate Unit.
